### 2. ORTOVOX 3+ INTUITION RATING ●●●●●

In search mode, the 3+ displays directional arrows and distance (in meters) to a buried victim. In send mode, the "intelligent position recognition" system automatically senses the beacon's orientation and switches transmission to the optimal antenna. Slightly more advanced, the new S1+ (\$450, not pictured) has a larger antenna and receiving range, and displays multiple burials relative to the rescuer. **[\$350; ortovox.com]**
